Circular truss of 3 m external diameter, made from three segments of reinforced square truss (300 mm x 300 mm).

CCQ-3 Circular Truss is manufactured from extruded aluminium tube (Alloy: EN-AW 6082 T6 according to the safety norm UNE-EN573) and TIG welded (continuous cord) for maximum strength.

They offer the best combination: strength, flexibility, as well as being lightweight and compact.

- Wall main tubes: Ø 50 mm x 2.5 mm

- Braces/Diagonals: Ø 25 mm x 2 mm
